

To Whom It May Concern,

It is my pleasure to provide this letter of recommendation for Stuart Tarnowski, whom I have had the privilege of working with during a critical phase of growth and strategic alignment at United Chronic Care Management (UCCM).

Stuart played an instrumental role in establishing and strengthening our partnership with Advanta Biometrics—an initiative that became a cornerstone of our operational expansion. Over the course of a 14-month collaboration, Stuart demonstrated exceptional leadership, foresight, and execution in fostering a relationship that enabled both organizations to align effectively and scale rapidly.

What sets Stuart apart is his ability to bridge strategy with execution. He possesses a rare combination of business acumen and relationship intelligence, allowing him to navigate complex healthcare dynamics while maintaining a clear focus on outcomes. His contributions were not only foundational in building the partnership, but also in sustaining momentum, optimizing workflows, and ensuring mutual success across both organizations.

Stuart consistently operated with professionalism, integrity, and a solutions-oriented mindset. He approached challenges with clarity and confidence, and his ability to communicate, collaborate, and lead across teams made a measurable impact on our growth trajectory.

Beyond his professional capabilities, Stuart is someone who brings genuine passion to his work. His commitment to advancing within the healthcare space is evident, and I have no doubt that he will continue to create meaningful impact as he embarks on his next chapter.

I strongly recommend Stuart Tarnowski for any opportunity he chooses to pursue. He is a proven leader, a strategic thinker, and a valuable asset to any organization fortunate enough to work with him.

Should you require any additional information, please feel free to contact me directly.

Warm regards,

Orian Henderson
